

The Power of JDL HealthTech

When you engage JDL HealthTech to assist your healthcare organization, you gain the power of HIPAA-compliant solutions delivered by a HIPAA-compliant business associate with superior expertise, strategic partnerships and demonstrated success. And that translates to an exceptional experience for you, your staff, and your patients.

The Power of HIPAA-Compliant Services

We deliver services that enable you to better manage your practice, achieve and maintain HIPAA compliance with both the Security and Privacy Rules, avoid violations and unwanted audits, keep your technology working smoothly, and take advantage of new technologies at affordable rates.

And we can do any or all of it as your Trustmark-certified Managed Services provider from our secure, state-of-the-art, HIPAA-compliant *Managed Services Operations Center*.

The Power of Superior Expertise

Certified, expert technologists and engineers comprise more than 70 percent of JDL staff, because we're committed to crafting the best valued-based solutions to meet your requirements today, and tomorrow, regardless of how healthcare changes.

- Collectively, our experts possess 475 years of technical experience, and
- Maintain more than 135 industry and professional certifications across a wide range of specialties.

No other technology services provider comes close to that bench strength—and no other is able to deliver solutions and ongoing support like we do.

The Power of Satisfied Clients

JDL HealthTech is a division of JDL Technologies, an IT powerhouse that has served a wide range of clients regionally, nationally and globally for 20 years. Clients choose us for our technical know-how, and stay with us for the same reason—with many trusting us to manage key components of their internal programs year after year after year.

The Power of Proven Success

As testament to our thought leadership in health technology, JDL HealthTech ebooks are always in high demand. Our report on *Data Breaches and Vulnerabilities in Healthcare* won Silver at the IT World 2015 Awards, and an ebook on the *Florida Information Protection Act* and how it relates to HIPAA won Gold in 2014. Our *HIPAA Pocket Guide* is a hands-down favorite. In addition, JDL is ranked among the *2015 Elite 150 Managed Service Providers in North America*, and we proudly hold the prestigious *Managed Services Trustmark* from CompTIA.

The Power of Partnerships

JDL enjoys rock-solid partnerships with leaders in practice management, wireless and wired networks, security, email, telephony and more—including McKesson, Citrix, Aerohive, 3CX, Microsoft, RingCentral and other brands you know and trust.

Perhaps our strongest partner is our parent company, Communications Systems Inc. (NASDAQ: JCS). With a solid financial record since 1981 and 2014 revenues of more than \$119 million, CSI is as committed to our success as we are to yours. Put the power to work for you today!
